

FITTING INSTRUCTIONS

Oil Cooler Guard for R1200GS & R1200GS Adventure

Contents

- 1 x Oil Cooler Guard
- 2 x Cable ties 290mm

1. Remove the side covers of your R1200GS.
2. These are attached to the rear by 2 quarter-turn fasteners with D-ring. Low front is quarter-turn plastic and front top is a pop out pin in a rubber hole.
3. Remove beak by removing the 3 fixing screws on both sides.
4. Loosen small black plastic cover across cockpit area under the gauges to the sides of the beak.
5. Take care popping them up where it attaches to the beak on both sides.
6. Now you can remove the beak by pulling it straight out towards the front.
7. Loosen oil cooler at its two attachment points and turn it downwards a bit to gain
8. better access.
9. Fasten the Oil Cooler Guard over the oil cooler and reattach it.

REMEMBER to reattach everything you have unattached to perform this alteration!
